

Hi! It's so nice to meet you. My name is

LE'AH.

Thirteen-year-old Le'ah misses the things that she used to love before she was diagnosed with a **connective tissue disorder**. She can no

longer ride roller coasters or the swings and she can't stay outside for a long time. Le'ah constantly has headaches and she wishes that her friends and siblings could understand what her life is like.

At Roundup River Ranch, things were different. Le'ah got to be around kids with similar medical conditions, friends who understood her problems. **Le'ah learned that it is okay to be different, and she now has more courage to be herself.** Everyone was nice at camp and she had so much fun! Her favorite memory from Roundup River Ranch was when she and her new friends scared one of their counselors, and she particularly enjoyed Candle Chat.

While she's only been to Roundup River Ranch one year, Le'ah can't wait to come back next year. **She knows that camp has already impacted her life. Camp gave her hope for the future.**
