

## Know Before You Apply! 2023 Infectious Disease Protocol

### CAPACITY

- Capacity will range by cabin and session to support camper needs.
- 8-12 campers per cabin during summer camp.
- 2-3 families per cabin during family camp.

### VACCINES

- All participants are required to complete the primary COVID vaccination series by May 10.  
*Camp highly recommends boosters per CDC guidelines.*
- See application for additional vaccination requirements.

### PRE-CAMP

- All participants will complete a formal arrival day symptom screening.

### TESTING

- Arrival testing may occur, dependent on current community spread.
- Exposure or symptomatic testing will be completed as needed.

*Testing provided by Camp free of charge.*

### MASKING

- Optional masking will be left to individual camper, volunteer, and staff choice.

### COHORTING

- No restrictions.
- Reactive pods (quarantine), will be created if infectious disease exposure occurs.

### ADDITIONAL POLICY UPDATES FROM 2022

- We are pleased to accept applications for participants who use CPAP/BiPAP or have dietary restrictions.
- There are no travel restrictions for campers and volunteers.
  - We recommend talking with your personal physician to decide if masking is right for you during travel.
  - The bus capacity will be increased from 10 to the bus maximum available.
- Volunteer vaccination policies:
  - Session volunteers are required to complete medical requirements, including submitting vaccination records. This includes volunteers working in cabins, medical, food services, and housekeeping.
  - Service project volunteers are not required to turn in proof of vaccination.
- Tour guests are welcome to see camp and are invited to join us for lunch. All guests will sit at a guest table.
